This workshop will present vital information to participants on the psychological, physical and spiritual effects of viewing pornography and associated activities and offer helpful suggestions for combatting this evil in our lives, families and society. The session is open to both men and women (age 18 and older).

Participation in this event in no way implies a person's engagement in the use of pornography.

Parents are *strongly encouraged to come*, that they might better understand the widespread temptations continually assaulting their children in their social circles, and online.
